

Equipment Maintenance Management Solutions

Commercial Operations

Equipment maintenance management solutions save you money, put you back in control of your maintenance program, and provide the management tools necessary for you to further reduce your long-term equipment maintenance budget.

◆ **Cost Reduction**

Savings from 10 to 22 percent compared to conventional maintenance contract pricing.

◆ **Cost Containment**

Eliminates the duplication and cost-inefficiencies that often occur with multiple service contracts from various manufacturers.

◆ **Guaranteed Budget**

Maintenance budgets can be planned with fixed annual costs rather than the fluctuating costs and expensive “surprises” of other maintenance programs.

◆ **Comprehensive Coverage**

Fills coverage gaps of traditional maintenance agreements by providing broader coverage.

◆ **Total Vendor Control**

You control who services your equipment and when it is convenient for you to schedule services.

◆ **Management Control**

Real-time, online reports enable you to more effectively analyze the quality of the repair and service and the performance of the equipment.

Take control of your maintenance budget

Manage your equipment performance

Keep your business running smoothly

Reduce Your Equipment Maintenance Costs

We analyze your current equipment maintenance portfolio, maintenance agreements, historical maintenance expenditures, and operational practices to develop a customized program to meet your unique needs. The goal of each program is to deliver the specialized management tools, expertise, and support necessary for you to achieve enhanced equipment performance coupled with significant cost savings.

How the Program Works

- ◆ Equipment failure occurs.
- ◆ Client calls vendor of choice.
- ◆ Vendor performs repair action and prepares equipment service report and invoice.
- ◆ The Remi Group generates a check reimbursing for covered corrective or preventive maintenance work.
